

HEIMDAL™ SECURITY ⚡

Thor Foresight Enterprise

Achieve proactive security and enhance your resilience with Thor Foresight Enterprise.

Proactive, next-gen security featuring EDR and HIPS capabilities to combat evolving threats and fully secure your organization.

The embedded **Darklayer GUARD™** is the EDR you need in this threatscape, bringing unique traffic-based malware blocking to prevent endpoint compromise and eliminate the risk of data exfiltration.

Alongside the proprietary **VectorN Detection™**, with its behavioral analysis of endpoint traffic and IOAs / IOCs, your organization gains the essential threat hunting tools to actually anticipate attacks and map out the security-critical points in your environment.

With the **X-Ploit Resilience** module, your organization gains the most powerful and flexible policy deployment tool, with: **automated vulnerability, patching - 3rd party software installation - essential intelligence reporting.**

Featuring automated vulnerability patching, 3rd party and Microsoft software installation alongside essential intelligence reporting, X-Ploit Resilience brings everything in one place, with granular controls so you can act precisely.

Fully customizable and **100% compatible** with existing solutions, **Thor Foresight Enterprise** provides unparalleled threat hunting and threat prevention to combat next-gen malware, ransomware and other enterprise threats.

Choose a flexible, cost-saving solution for patch and software deployment management.

Eliminate the vulnerabilities that can expose your valuable data.

Take your cyber resilience to the next level with the next-gen EDR solution

Multiple deployment tools create confusion, slow down your reaction time and open your enterprise to devastating malware and ransomware attacks.

99% OF EXPLOITED VULNERABILITIES

99% of the vulnerabilities exploited will be the ones known to security and IT professionals for at least a year.

- Gartner

Outdated software is the most common attack vector. It leaves your organization exposed and can result in ransomware infections or critical data leaks.

\$5 MILLION IN DAMAGE COSTS

\$5 million – the average cost of a single ransomware attack.

- Ponemon Institute

3,785 CORPORATE DATA BREACHES

In 2017, as recorded in The Internet Crime Complaint Center (IC3). On average, 10 data breaches happen daily.

- FBI

Vulnerability management should not be a game of whack-a-mole, nor the biggest time-sink in your workflows because of antiquated, opaque solutions.

Move beyond SCCM / WSUS and discover this unique threat prevention and policy deployment tool for an unrivaled control over your entire infrastructure.

X-Ploit Resilience: the next-gen, fully automated patching and software management solution.

Exercise true control over your environment and build true resilience in front of critical cyber threats like ransomware.

Leading product and intelligence

Appraised by the FBI, working with EUROPOL and USDOJ and endorsed by NC3

"How do we defend our organization against phishing attacks?"

How do we ensure that our software and devices are up to date?"

- National Cyber Security Centre (NCSC UK)

These are the questions Boards should ask about their company's IT Security.

- What will be your response?

Criminals can easily bypass behavior and code scanners like Antivirus, as well as firewalls, unleashing devastating ransomware attacks or creating data breaches that will damage your organization.

That is why reactive solutions are no longer enough.

Thor Foresight Enterprise will give you the proactive, code-autonomous tools to prevent, not just mitigate attacks.

* - Only some Antivirus

Thor Foresight Enterprise is compatible with:

Windows 7 | Windows 8 and 8.1 | Windows 10 | MacOS 10.13 and above | Android | VM Ware | Hyper V

✓ The essential Host-Based Intrusion Prevention System (HIPS)

DarkLayer Guard™ is a unique 2-way traffic filtering engine that supports fully customizable white/black listing.

With it, your organization can block network communication to mitigate Zero Hour exploits, Ransomware C&C's, next-gen attacks and data leakages. Using our ground-breaking Threat To Process Correlation technology, we can identify attacking processes and provide HIPS capabilities for endpoints.

✓ Code-autonomous detection to find threats unseen by NGAV and code scanners

By tracking device-to-infrastructure communication, VectorN Detection™ will detect 2nd generation malware strains that no other product can see, effectively delivering a HIDS at the machine traffic layer.

Using machine learning to establish compromise patterns and offering indicators of compromise/attack (IOA/IOC), this is a unique add-on that will boost any other type of endpoint security.

✓ SAM and Preemptive Vulnerability Management

With X-Ploit Resilience, you can see and manage your entire software inventory anywhere in the world. This scalable, flexible and streamlined module will let you directly close vulnerabilities, mitigate exploits and achieve compliance.

It handles both Microsoft and 3rd party software management, leveraging Heimdal's Global CDN Infrastructure to deploy updates and new software based on your unique policy.

This unique, threat prevention approach to security will layer on top of existing solutions to create true cyber resilience and demonstrate flawless compliance.

Your organization needs true cyber resilience against both known and unknown threats.

Get in touch today to discover award-winning endpoint security.
