

# Netwrix Auditor for VMware

## Ease the burden of VMware auditing

Netwrix Auditor for VMware **simplifies IT auditing** of your virtual infrastructure by providing **complete visibility** into changes, logons and permissions. Its ready-to-use intelligence empowers you to minimize the risk of **security breaches**, streamline **compliance audits** and **meet the demands of your organization** without constantly being overburdened.

### REDUCE THE RISK OF A SECURITY BREACH

Improve your security posture by exposing loose permissions and ensuring timely detection of critical activity, such as suspicious logon attempts and host changes. Provide informed response before any damage is done.

### PROVE COMPLIANCE WITH LESS EFFORT

Slash the time required to prepare for audits by up to 85% and quickly address ad-hoc questions from auditors. Get the actionable intelligence you need to achieve, prove and maintain compliance with less effort and expense.

### MINIMIZE DISRUPTIONS TO YOUR BUSINESS

Quickly uncover and investigate incidents, such as improper changes to the configuration of a critical VM or the entire virtual datacenter, and remediate them before they hurt user productivity or business operations.

## CUSTOMER FEEDBACK

"I'm executing VMware auditing with Netwrix Auditor and it works marvelously! I get my daily email at 3:00 am, and it gives me detailed information about what has changed in the environment. It does what you designed it to do"

Jeff Doe  
Faegre & Benson Law Firm

# Key Features of Netwrix Auditor for VMware

## VISIBILITY INTO EVERY CHANGE

Spot suspicious events in time to prevent security or performance issues. Easy-to-read reports detail every change to critical elements of your virtual infrastructure, such as vSphere, vCenter and ESXi hosts.

## LOGON ACTIVITY MONITORING

Enforce access controls, investigate security incidents and prove regulatory compliance with detailed reports on all successful and failed attempts to log on to your VMware environment.

## CONTROL OVER ACCESS RIGHTS

Spend minutes, not hours, whenever you need to validate that permissions are aligned with employees' roles. Ensure no blind spots are left for malicious actors to exploit to gain access to your virtualized resources.

## ALERTS ON CRITICAL ACTIVITY

Be proactively notified about critical activity, such as suspicious logon attempts or modifications of virtual machines, so you can investigate it promptly and respond before you suffer downtime or a security breach.

## INTERACTIVE SEARCH

Slash time investigating security and operational incidents and resolving user issues by getting the specific information you need in minutes using the Google-like search.

## BEHAVIOR ANOMALY DISCOVERY

Improve detection of threat actors with a single view of anomalous activity across your VMware environment and other critical systems. Identify the riskiest users at a glance and dive into their actions in a few clicks.

## HOW IS NETWRIX AUDITOR FOR VMWARE DIFFERENT?

### NON-INTRUSIVE ARCHITECTURE

Avoid the nightmare of dealing with intrusive agents and undocumented data collection methods.

### TWO-TIERED DATA STORAGE

Keep your entire audit trail for more than 10 years in a reliable and cost-effective storage, while ensuring secure on-demand access to it throughout the whole retention period.

### RESTFUL API

Integrate Netwrix Auditor with other security, compliance and IT automation tools to expand visibility to other systems and have your entire audit trail available from a single place.
