netwrix

Don't Let Ransomware Kidnap Your Data and Freeze Your Business

Prevent ransomware infections and thwart attacks in progress by implementing a multi-layered approach to security. Proactively identify and mitigate weak spots to keep ransomware out, and catch and stop attacks before they hit your data, shutter your business and shatter your career.

BUILD STRONG FENCES TO MINIMIZE RANSOMWARE INFECTIONS

Identify and mitigate weak spots in your security posture to minimize the risk of successful ransomware attacks, or any potential damage one can cause.

SPOT AND BLOCK RANSOMWARE ACTIVITY IN ITS EARLY STAGES

Spot signs of ransomware being planted or activated in your network and respond in time to avoid serious damage.

RECOVER QUICKLY AND PREVENT FUTURE INFECTIONS

Quickly understand the details and scope of an attack to speed restoration of business operations, and improve your security posture.

CUSTOMER FEEDBACK

"With Netwrix Auditor helping us combat ransomware, we saved an important vocational program and **avoided more than $60,000 in fines.**"

Pierre Dehombreux, IT Director,
Whiteriver Unified School District

Ransomware Protection Done Right
netwrix.com/ransomware

Key features

REAL-TIME THREAT DETECTION

Detect even slight signs of compromise that could indicate ransomware being planted or in action, so you can respond in time to prevent devastating consequences.

AUTOMATED THREAT RESPONSE

Contain ransomware before it's too late by automatically disabling the compromised account, ending the session or running your own custom script.

COMPLETE SOLUTION

Protect your organization's against ransomware infections and mitigate the damage from attacks with a multi-layered approach to security.

RISK ASSESSMENT

Pinpoint the most significant risks to your sensitive data, such excessive user permissions, potentially harmful files, and data accessible to everyone.

CONTROL OVER PERMISSIONS

Strictly enforce least privilege by limiting users' access based on their roles and using on-demand privilege for administrative tasks.

ECOSYSTEM INTEGRATIONS

Maximize the effectiveness of your ransomware protection strategy by integrating Netwrix products with your ITSM, SIEM and other security tools.

INCIDENT INVESTIGATION

Quickly understand where an attack started, how it unfolded and what was affected, so you can formulate the best response.

DATA RECOVERY INVENTORY

Minimize business disruptions using a clear inventory of what files were affected to prioritize your recovery efforts.

FIRST-CLASS TECHNICAL SUPPORT

Have your issues promptly resolved by first-class technical support with a 97% satisfaction rate.
